

Panasonic

MAF1

Zengineered® craftsmanship
and a comprehensive full-body
massage experience for
any living space.

ZENGINEERED

\zen-juh-need\ verb:
To artfully blend
ancient ideas of
meditation and
intuition with
unsurpassed, state-
of-the-art technology.

ZENGINEERED® FOR ANY SIZE HOME

At only 27 inches wide, the MAF1 is Panasonic's most compact full-body massage chair ever, allowing it to bring the highly therapeutic deep tissue massage that Panasonic is known for to even the smallest living spaces without sacrificing massage coverage or quality.

ZENGINEERED. The heart and soul of our massage chairs.

For over a century, Panasonic has developed highly-regarded consumer and industrial products that marry innovative technology with thoughtful design.

Delicate enough to caress, powerful enough to provide deep therapy, and soothing enough to promote relaxation, every part of Panasonic massage chairs has been thoughtfully engineered. The combination of advanced technology and expert craftsmanship produces satisfying results for the most discerning individuals.

NOTABLE FEATURES

Compact Design

It's compact! At just 27 inches wide, the MAF1 will fit in any room in your house, condo, or apartment. The quality and comprehensiveness of the massage you receive is no longer limited by the size of your home.

Heated Massage Heads

Massage heads provide penetrating, healing infrared heat to help loosen your muscles and increase blood flow to the muscles of your back.

Full Body Massage

Don't let its compact size fool you. The MAF1 back massage, foot rollers, and abundant air massage coverage works you from the soles of your feet to the top of your neck. Remember the three Cs - Compact, Complete, AND Comprehensive.

Panasonic 4D Massage Engine

The Panasonic 4D Massage Engine is more advanced and better engineered than any other mechanism you'll find in a compact massage chair. You'll experience full 3D intensity adjustment and advanced 4D speed variability in the automatic and manual sessions. With the ability to narrow the distance between rollers to just 1.5 inches, it delivers exceptional massage for the interior erector spinae muscles that parallel your spine.

Full Body Air Massage

Feet-to-shoulders air cell coverage cradle you in deeply soothing compression massage that improves overall circulation. You can customize air zones to focus on the specific areas of your body you want to treat.

S-Track

The Panasonic S-Track guides the 4D Massage Engine closely along the contours of your back. It is also optimally designed to provide superior massage in the lay-flat position and an excellent full-body stretch.

Massuese-like movements

The MAF1 simulates the tapping, kneading, stroking, and stretching movements of veteran massage experts.

Full Body Air Massage

Feet-to-shoulders air cell coverage cradle you in deeply soothing compression massage that improves overall circulation. You can customize air zones to focus on the specific areas of your body you want to treat.

NOTABLE FEATURES, CONTINUED

Precision Body Scan

Each session begins with a detailed body scan that customizes the massage to you. Life-like massage motions are targeted precisely to locations where they are needed to dissolve tension, fatigue, and pain.

Wrap-Around Lower Leg Massage

Calf air cells wrap around the lower leg to provide compression for the anterior tibialis (shins). This is a frequent area of soreness and fatigue that is rarely addressed by other massage chairs.

Precision Reflexology Foot Massage

Carefully-designed rollers activate pressure points in the feet to improve your wellness and flexibility from the bottom up. Meanwhile air cells provide soothing compression for swollen or tired feet and gently shift the angle of your foot to give the rollers access to all the key points on your feet.

Tactile LCD Remote

There is beauty in simplicity. Easily navigate the intuitive menus on the LCD screen in light or dark with backlit tactile buttons.

Every MAF1 feature has been **ZENGINEERED** to deliver carefully-crafted and holistic healing and relief.

PROGRAMS AND TECHNIQUES

Deep

The MAF1 relieves trigger points and stiffness by combining deep kneading, tapping, and rolling motions with heat and full body stretch actions. Your arms, legs, and feet receive firm compression from air cells, and soles are thoroughly massaged by the mechanical foot rollers.

Swedish

For a more relaxing and soothing massage, the MAF1 uses lighter spreading motions across the surface of the back, while air cells provide gentle compression to hands and feet.

Quick

When you need a therapeutic massage but are short on time, this shorter version of the Deep massage program focuses on areas of the back that are most likely to be sore, stiff, or fatigued.

Reflexology

Kneading the soft fleshy ball of your foot and pushing deep into the arch are just a few of the many small, intense movements you'll experience during the MAF1's reflexology foot massage..

But reflexology is more than simply a foot massage. The practice and purpose go deeper than the skin and muscles by using specific reflex points on the feet to induce a healing response elsewhere in the body.

By repeatedly applying pressure and manipulating nerve endings in the foot, reflexology can help to clear channels of blocked energy by moving the flow of blood, nutrients, and nerve impulses to ultimately help improve overall health and balance.

Parasonic

Learn More

When you join the Panasonic family, you'll expect to enjoy many years of trouble-free massage therapy from your chair. The day you make your purchase marks the beginning of our relationship with you. Our exceptional technical support and service team looks forward to caring for you and your product for many years to come.
