

OHCO[®]

Massage Redefined™

M.8 NEO
&
M.8 NEO LE

THE ESSENCE OF OHCO

A pleasant interjection. A subtle exclamation. A perfect escape.

OHCO is the wisdom of a shiatsu master, the talent of a visionary designer and the perfect synthesis of unprecedented massage technology. OHCO is the flawless union of the ancient art of massage and a modern, timelessly luxurious experience.

With thoughtful direction, the OHCO M.8 NEO and M.8 NEO *LE* transport you to a place of deep relaxation and thorough renewal. Nurturing, precise movements mirror the hands of a shiatsu master—melting tension, relieving pain and awakening all your senses.

Our boldest expression of the M-Series is the M.8 NEO *LE*—crafted with top-grain leather, sumptuous TORAY® Ultrasuede® and rose gold trim. Our Limited Edition is a work of art, each one accompanied by a numbered and signed Certificate of Authenticity.

Envelop yourself in complete serenity as the unexpected becomes a part of your every day.

OHCO

STILLNESS AMIDST MOTION

Developed in collaboration with globally acclaimed designer Ken Okuyama, the M-Series is unequalled in elegance and performance.

Known for designing bullet trains that eclipse 200 mph (320 kph) and creating the most exclusive Ferrari ever sold, Ken Okuyama built a reputation for speed.

Yet to fully understand speed, one must also understand stillness, and it is in stillness where master Okuyama finds renewal. Like his Shinkansen train interiors, his OHCO designs are a bridge between relentless motion and restful tranquility, balancing modern engineering with stillness, quiet, and peace.

A handwritten signature in black ink, reading "Ken Okuyama".

“You have to design the whole environment. Without that, the story doesn’t carry through.”

KEN OKUYAMA

“Creating equal, supportive pressure along the energy meridians of the body releases one into a state of emotional relaxation and brings harmony to both the body and mind.”

AKIRA OKABAYASHI

IN THE HANDS OF A MASTER

Renowned shiatsu master Akira Okabayashi begins his therapeutic sessions with a single, simple touch. Without exchanging a word, he discerns emotions, feels for stiffness and begins the process of re-tuning and redirecting body and mind toward a harmonious center.

The intuition and expertise of Okabayashi sensei is the heart and soul of the OHCO symphony of movement.

Under his direction and oversight, OHCO engineers created an unsurpassed orchestration of touch that brings your whole person into balance, unleashes the body’s self-healing power and rejuvenates both mind and muscle.

THE ETHOS OF JAPANESE CRAFTSMANSHIP

In Japan, a standard of excellence is not a fixed point, but a tireless search for improvement. It is an attention to detail, a spirit that never stops striving and the reason that the M.8 NEO and M.8 NEO LE are imagined by a renowned Japanese designer, choreographed by a Japanese shiatsu master and made in Japan.

CHANGE YOUR STATE OF BEING WITH THE STATE OF THE ART

Total Coverage. Maximum Relief.

With the M.8 Neo's Movesync™ Dual Massage System, two mechanisms move in tandem for a supremely nuanced massage. The Sens8 mechanism provides versatile and precise massage for the back and glutes, while a second mechanism located in the headrest is specifically designed for the sensitive muscles of the human neck.

Infinite Choices. Zero Compromise.

Maxtrack™ allows the M.8 NEO to move seamlessly from lie flat position, to zero gravity, to upright, and all positions in-between, for an exceptionally therapeutic full body stretch and comprehensive massage from your neck to your glutes.

Step Into Unsurpassed Serenity

Move into and out of your M.8 NEO with ease and grace. An OHCO original innovation, dual Easy Access Doors make getting into and out of your chair easy and relaxing.

Immersive Touch

Exclusively from OHCO, experience the proprietary Arms of Embrace™, offering unique arm massaging capabilities and deep therapy unavailable from any other massage chair in the world. Six independently-controlled air cells in each arm allow for over 479,000,000 unique sequences and an unprecedented level of precision as your arms, wrists and hands are massaged in soothing coordination.

Advanced Movement. Superior Comfort.

Let tension melt as the complex movements of TheraElliptical™ Calf Kneading mimic the hands of a shiatsu master, gently compressing and kneading the sides of your calves and massaging the medial line along the back of your calves. This powerful and soothing capability loosens stiff muscles and enhances circulation, leaving your calves refreshed and renewed.

The Choreography Of Perfection

Our proprietary Sens8 NEO Massage Mechanism is uniquely crafted and controlled to feel consummately lifelike. In addition to basic movements—tapping, kneading, rolling, and combinations thereof—the 4D engine uses advanced massage algorithms to mimic the feel of human hands and provide an experience that's maximally therapeutic and deeply relaxing.

BEYOND TOUCH

Air Ionizer

Located in the head rest, the air ion generator clears dust, dander, spores and other pollutants from the air, while at the same time offering a soothing white noise to drown out the distracting sounds around you.

Aromatherapy

Add your favorite essential oil to the aromatherapy slot located in the head rest of the chair and enhance your ability to rest your mind and body by activating your olfactory senses.

M-Sense Light Pool

Your path to rejuvenation is illuminated by the M.8 NEO's welcoming pool of motion-activated light. This slow dance of colorful light begins to ease your mind even before your massage begins.

Chromotherapy

Take escape to a new level by combing deeply relaxing visual cues with the physical elements of massage. Choose from various color patterns and sink into a trance as the remote and Light Pool gradually transition between soothing colors. In a darkened room, the indirect glow of slowly shifting colors play on floors, walls and ceiling, coalescing with massage sensations for the most enchanting escape imaginable.

Bluetooth Audio Immersion

Enhance and deepen your massage experience by connecting your smart device to play music, relaxing sounds or your favorite guided meditation.
